

3rd European Panel Products Symposium

6, 7, 8 October 1999

Table of Contents

Keynote Address:

New Product Development Processes and Future Strategies of CSC Forest Products:
A Guide for Academia

RM Elias 1

Session 1: Fundamental Properties

An Investigation of the Influence of Wood Density on the Rheological Behaviour
and Dimensional Stability of Hot-Pressed Particles

MA Irle 7

The Continuous Pressing Process for Wood-Based Panels: An Analytical Simulation
Model

H Thoemen and PE Humphrey 18

The Use of Confocal Microscopy and Image Analysis to Estimate Fibre Alignment
in Different MDF Panels

PR Gillah, A Thumm and MA Irle 31

Medium Density Fibreboard from Novel Fibre Types

JP Alexander, AG McDonald and JRB Hague 43

The Hygrothermal Treatment of Natural Fibres: Part 1 – Spruce

D Jones, K Strømdahl, P Hoffmeyer, P Folting, G Fischer and AB Olesen 54

Session 2: Resins

Urea Formaldehyde / Diphenylmethane Diisocyanate Copolymer Adhesives:
Possible Use as an Adhesive System for Straw Based Particleboard

T Adcock, MP Wolcott, and SM Peyer 67

Medium Density Fibreboard Bonded with Cure-Accelerated Phenol-Formaldehyde
Adhesives

B-D Park, X-M Wang, A Moffet and B Riedl 77

Use of Spruce Tannin as a Binder in Particleboards and Medium Density
Fibreboards (MDF)

E Roffael, B Dix and J Okum 89

Improvement of Powdered Phenolic Resin Distribution with Different Wax and
Resin Application Systems

X-M Wang, L Calvé, D Lefebvre and B-D Park 98

Session 3: VOCs / Emissions

Japanese Desiccator Method JIS A 5905: A Study into the Factors Causing Inter-Laboratory Differences <i>S Young</i>	113
An Overview of Laboratory Methods for the Determination of VOC Emissions During the Pressing of Wood Panels <i>BM Broline</i>	124
On the Formaldehyde Release of Wood <i>M Schäfer and E Roffael</i>	136
Influence of the Manufacturing Process on Plywood Formaldehyde Emission and Content <i>ME Martínez Martín and MI Belanche Paricio</i>	137

Session 4: Process Technologies

Experiences with OSB Produced on ContiRoll? Systems <i>A Wösthelrich and C Caesar</i>	145
Refining Technology for Low Grade Materials including Urban Wood Waste <i>T Olofsson</i>	155
The Influence of Blowline Dynamics on Resin Blending Performance <i>K Chapman</i>	164
Cleaning Recycled Urban Waste Wood Materials for Panelboard Processes <i>S Saukkonen</i>	176
Novel Pre-Treatment Technology for Wastewaters from Wood-Panel Manufacturing Facilities <i>A Deligiannis, P Gikas and D Chatzopoulos</i>	177
OSB Pressing Optimisation and Problem Solving using Monitoring of Temperature and Gas Pressure <i>J Alexopoulos</i>	190
Development of moulded products from wood fibre mats <i>R Torgilsson and M Lawther</i>	209

Session 5: NDT

PanelMSR® – An On-line Stiffness Tester for Engineered Wood Panels <i>P Lister, M Dunne, R McDonald and D Evans</i>	215
Industrial Thermographic Inspection of Delaminations in Laminated Wood-Based Panels <i>P Meinlschmidt and J Sembach</i>	227
Cost Reduction by The Integration of Process Control Technology and Statistical Process Optimisation <i>G Bernardy, B Scherff, A Lingen and A Schlipf</i>	235
Quality Control after Hot Pressing <i>K Kruse and M Ohlmeyer</i>	247

Measurement and Analysis of Whole Panel Density Distributions <i>MP Wolcott, R Wellwood, S Chen, A Bozo, J Hermanson and J Johnson</i>	255
---	-----

Session 6: Specifications, Properties and Markets

The Importance of the Utilisation of Wood-Based Panels in the German Building Industry <i>H Reschop</i>	273
The Implementation of a Performance Testing Approach for Floors, Walls and Roofs in the EU <i>J Adelhoj and V Kearley</i>	281
Hot Stacking and its Effects on Panel Properties <i>M Ohlmeyer and K Kruse</i>	293

Technical Presentation Forum

Improved Extration of Pine Bark for Wood Adhesives <i>FC Jorge, P Brito, L Pepino, A Portugal, MH Gil, MA Irle, RP da Costa ..</i>	301
FIBERTRON IV – Rapid Size Measurement by Image Analysis <i>ET McCarthy</i>	308
Mechanical Properties, Bond Quality of Surface Activated Wood Strips <i>NS Çetin, CAS Hill and N Özmen</i>	310
Physical Properties of Preservative Treated Strandboards <i>G Goroyias, M Hale and S Forster</i>	316
Making Steam Work: An Introduction to the Utilisation of Super Heated Steam for Drying of MDF Fibres <i>K Radzimanowski</i>	324
Some Aspects of the Permeation of Veneers with Phenolic Resins <i>A Mitisor, VD Maiorescu and V Petrovici</i>	328
Forintek Canada Corp: MDF Pilot Plant <i>A Moffet</i>	333
Automatic Surface Inspection System (SIS) <i>T Gustavsen</i>	335
Current Research on Wood-Based Panels at LEPÆ <i>LMH Carvalho and CAV Costa</i>	338
Mechanical Properties of Acetylated Fiberboard with Zonation <i>H Korai, K Yamamoto, M Kiguchi, Y Hatano and S Hosoya</i>	339
Agrowaste Panels Bonded with UF and UF:PMDI Resins <i>AH Grigoriou and GA Ntalos</i>	340
Elastic and Viscoelastic Characterisation of Wood-Based Panels <i>L Le Magorou, F Rouger and F Bos</i>	345
Quantifying Individual Fibre Surface Properties with the Atomic Force Microscope <i>R Snell, LH Groom and TG Rials</i>	351
High Performance Wood-Fibre/Plastic Composites by Chemical Modification <i>MC Timar, K Maher, M Irle and MD Mihai</i>	352

Wood Composite Materials Based on Ecologically Safe Adhesives <i>O Figovsky, V Tepper and L Sklyarsky</i>	359
