

4th European Panel Products Symposium

11, 12, 13 October 2000

Table of Contents

Keynote Address:

The Future of Wood-Based Panels: What can the Wood-based Panels Sector Learn from the Synthetic Composites Industry?	1
<i>P Bonfield</i>	

Session 1: Product Properties

The Wettability of Medium Density Fiberboard:	
<i>M Barbu, H Resch and M Prukner</i>	14
Exploitation of the Shear Properties of Wood-based Panels:	
<i>V Kearley</i>	22
Effect of Resin Type on OSB Durability:	
<i>J Alexander, S Shaler and W Wright</i>	34
Characterisation of Formaldehyde Emission from Coated Wood Panel Products for Indoor Applications:	
<i>C Yu and D Crump</i>	45
Decay Resistance of Tanalith 3485 Treated Strandboards:	
<i>G Goroyias and M Hale</i>	54

Session 2: Fundamental Properties

Cell Wall Collapse and the Pressing of Particleboards:	
<i>M Irle</i>	70
Effects of Varying Refiner Pressure on the Mechanical Properties of Loblolly Pine Fibres:	
<i>L Groom, T Rials and R Snell</i>	81
Fracture Mechanics of Resin Coated Single Wood Fibres:	
<i>A Egan and S Shaler</i>	95

Session 3: Adhesion

Optimised Bonding Solutions for the New Millennium:	
<i>M Dunky</i>	104
Advances in Adhesive Detection and Measurement in Panel Products:	
	114

F Kamke, H Sizemore, K Scott, J-B Ra and C Kamke

Session 3: Adhesion (continued)

OSB Glued with Phenol and Tannin Resins:	
<i>K Kruse and J Hasener</i>	125
A Novel Resin System for Colourless OSB Production:	
<i>E Athanasiadou and S Tsiantzi</i>	132
Novel 'Fast Cure' Technology for the Production of OSB with MDI-Based Binders:	
<i>C Skinner and R Kaufmann</i>	141
Organosolve Lignin Phenol Formaldehyde Resins as Binders for Particleboard:	
<i>N Özmen, A Lightbody, J Tomkinson, N Çetin, J Skinner and M Hale</i>	157

Session 4: Raw Materials

Thermo-mechanical (TMP) and Chemo-thermo-mechanical Pulps (CTMP) for Medium Density Fibreboards:	167
<i>E Roffael, B Dix and T Schneider</i>	
Production and Characterisation of Coffee Husks Particleboards:	
<i>W Ogola, E Bisandra and J Tesha</i>	175
Straw Particleboards: Effects of Chemical Treatments on Board Properties:	
<i>G Han, S Kawai and K Umemura</i>	186
The Effects of Acetylation on some Properties of Medium Density Fiberboards:	
<i>M Usta, Z Serin, E Gümüşkaya and T Küçükömeroğlu</i>	193

Session 5: Process Technologies

Fibre Moisture Control in MDF Manufacture:	
<i>K Chapman</i>	201
Uniformer™ - Fibre Mat Formers for the MDF Industry:	
<i>T Olofsson</i>	211

Session 6: Economics / LCA

Environmental Assessment of the UK Wood Based Panels Sector:	
<i>J Mundy, W Thorpe and P Bonfield</i>	219

Economic Analyses of MDF Production:

A Janssen and K Kruse

220

Session 7: NDT

Adaptive Processing of Wood for Fiberboards by High Level Spectroscopic On-Line Control:	227
<i>R Kessler, T Reinhardt, W Kessler and H Zimmer</i>	
Monitoring Fibre Orientation in OSB during Production using Filtered Image Analysis:	236
<i>T Nishimura and M Ansell</i>	
Quality Control in LVL and Panel board Production:	241
<i>H Kleinschmidt</i>	

Technical Presentation Forum

Determining MDF Blowline Conditions and their Effect on Resin Blending Performance	248
<i>K Chapman</i>	
Comparison of Isocyanate binders for the Production of OSB at Enhanced Rates: A Laboratory Study	249
<i>J Lauwers, C Watt and C Skinner</i>	
Significant Reduction in Production Costs with SPOC	250
<i>G Bernardy, J Gebhardt and A Lingen</i>	
Visualizing the Impact of Resin Composition on Penetration and Water Ingress: An NMR Imaging Investigation	254
<i>P Stroobants, W Daunch and C Skinner</i>	
Enhancing the Efficiency and Competitiveness of Wood-based Panels in Construction “Panels”	255
<i>P Bonfield and M Fan</i>	
Decay Resistance of Commercial OSB	256
<i>G Goroyias and D Hale</i>	
UV Protection of Wood by Chemical Modification and Subsequent Graft Polymerisation	266
<i>N Çetin, C Hill and N Özmen</i>	
Computer Modelling of Fibreboard Webbed I-Beams	272
<i>ZW Guan</i>	
Urea Formaldehyde and Isocyanate Resins - Property Comparisons	279
<i>A Papadopoulos</i>
