

# 7<sup>th</sup> European Panel Products Symposium

## 8, 9, 10 October 2003

### Table of Contents

#### **Session 1: Fundamentals**

Characterisation of Wood Fibres for MDF - Off-Line and On-Line Measurements for Production Monitoring:	1
<i>B Benker, M Erbreich, B Plinke and A Wollmann</i> .....	
Characterisation of Modern Wet-Process Fibreboard Production using Experimental Design:	14
<i>T Hutter, R Kessler, J Zander and A Ganz</i> .....	
Improving the Compatibility of Pine, Eucalypt and Cork with Portland Cement for the Manufacture of Panel Products:	26
<i>C Pereira, F Caldeira Jorge, M Irle and J Ferreira</i> .....	
Effect of Various Stress Modes on Short- and Long- Term Performance of a Range of Wood Based Panel Products:	38
<i>M Fan, P Bonfield, V Enjily, V Kearley, I Rochester; J Adhoj and J Lorrington</i> ...	

#### **Session 2: Resin Technology**

Molecular Structure of PMDI-Adhesives:	51
<i>D Grunwald</i> .....	
Blocked Isocyanates in UF-Resins: Reaction Pathways and Crosslinking:	57
<i>V Shadurka, W Binder, M Dunky and W Kantner</i> .....	
Competitive MUF: Increased Cure Speed of Aminoplast Adhesives by Formaldehyde Post-Addition:	70
<i>S Kranenburg, J Mattheij, A Van der Waals, L Evers and G Oosting</i> .....	
New Face Resin for OSB:	75
<i>J Gomez-Bueso, J Mattheij, L Evers, W Kantner and M Dunky</i> .....	

#### **Session 3: Process Control**

End-to-End Production and Business Processes Increase Plant Availability and Reduce Rejected Production:	83
<i>H Barth, G Bernardy, R Germes, A Lingen, T Sandweg, and N Scholz</i> .....	
New On-Line Controller of Mat Basis Weight and Moisture Content:	92
<i>ET McCarthy, M Miller, D Dunn and R King</i> .....	

Practical Application of a Blowline Blending Model: <i>K Chapman and P Jordan</i> .....	102
Ultra-Scan Delamination Detection with New Power Sonic Resonance Technology increases Panel Board Production: <i>H Kleinschmidt</i> .....	111
Ultrasonic and Density Profile Parameters - How Useful are they for Statistical Process Modeling?: <i>J Hasener and H Thoemen</i> .....	115
On-line Detection of Bonding Defects in Paper Laminating using Thermography: <i>P Meinschmidt, F Schlüter, V Märgner and H El-Abed</i> .....	127

## Session 4: Product Specification and Markets

On it goes. CE Marking of Wood-Based Panels for Constructions: <i>J Adelhoj</i> .....	137
PS2 Performance Criteria and the Development of Design Capacities for OSB used in the United States: <i>J Vogt and S Winistorfer</i> .....	152
Models for Designing Oriented Strand Board Floor Decking with Concentrated Load: <i>W Thomas</i> .....	159
Isobord and Beyond - Turning Straw Dreams into Technical and Commercial Reality: <i>G Gall and P Jardine</i> .....	171
The Panel Surfacing Business - Future Challenges: <i>C O'Carroll</i> .....	181

## Session 5: Environment

Life Cycle Assessment (LCA) of Panel Products - Experiences and Future Perspectives: <i>R Murphy and B Hillier</i> .....	187
Engineered Wood: Helping to Achieve Sustainable Construction?: <i>S Edwards</i> .....	196
Combined Waste Air and Water Treatment Plant for the Wood Panel Industry: <i>K Portenkirchner, M Barbu and O Stassen</i> .....	201
The Measurement of Contaminants in Recycled Wood and Products made from Recycled Wood: <i>M Irle, C Fru, K Maher and G Ormondroyd</i> .....	208

An Overview on New Generation of Preservation Treatments for Wood-Based Panels and Other Engineered Wood Products:	219
<i>A Ross, H Ward, and W Ramsay Smith</i> .....	

## Technical Presentation Forum

A Protocol for the Sampling of Recycled Wood and the Resulting Chipboard for Contaminant Analysis:	T-1
<i>C Fru, M Irle, K Maher and G Ormondroyd</i> .....	
Analysis of PF-Adhesives by <sup>1</sup> H-NMR and GPC:	T-4
<i>D Grunwald</i> .....	
Fracture Energy Determination based on Fracture Cleavage Testing of Adhesively-Bonded Spruce:	T-8
<i>R Eckmann and M Dunky</i> .....	
Curing Behaviour of MUF Resins:	T-15
<i>J Mijatovic, M Dunky and W Kantner</i> .....	
Near-Infrared Reflection Analysis (NIRA) as a Tool for Assessing Recycled Wood Particleboard Production:	T-20
<i>A McLaughlin, G Goroyias and G Lloyd Jones</i> .....	
Mounting Wet and Dry Processed Fibreboards with Flame Retardancy:	T-24
<i>E Zikulnig-Rusch, A Kandelbauer, RW Kessler and G Wuzella</i> .....	
An Investigation of the Rheological Behaviour of Wood Particles during Hot-Pressing:	T-30
<i>E Ncube, M Irle and H Mansfield-Williams</i> .....	
A Study of Edge Roughness of Medium Density Fibreboard:	T-39
<i>S Holland and D Joy</i> .....	
Evaluation of the Mechanical Woodworking Influence on Adherend-Surfaces of Spruce:	T-45
<i>R Eckmann and M Dunky</i> .....	
New Termite and Mould Testing Methodologies for Wood-Based Products:	T-51
<i>W Smith, H Ward and A Ross</i> .....	
IR-Spectroscopic Investigations of Blocked Isocyanates in UF-Resins:	T-59
<i>V Shadurka, W Binder, M Dunky and W Kantner</i> .....	
Characterisation and Influence of Strand Waviness in a Wood-Strand Composite:	T-65
<i>V Yadama and M Wolcott</i> .....	
Comparison of Hardener Systems for Aminoplastic Resins:	T-71
<i>B Stefke, M Dunky and W Kantner</i> .....
