

Table of Contents

Session 1: Opportunities for Wood Modification in the Panels Industry

Wood Modification in the Composites Industry: Its Present and Medium-Term Viability <i>Dennis Jones</i>	3
Acetylated Fibreboards – Results From Over Ten Years of Field and Commodity Testing <i>M. Westin, R. M. Rowell and T. Nilsson</i>	11
Silicones as Protecting Agents for Edges of Board Materials <i>L. De Vetter and J. Van Acker</i>	19

Keynote Address:

The Panel Board Industry – A Furniture Maker’s Perspective <i>Eunice Cinnamon</i>	31
--------------------------------------------------------------------------------------------	----

Session 2: Focus on Plywood and OSB

Technological and Economic Feasibility to Produce OSB with Enhanced Properties in Brazil <i>C. H. S. Del Menezzi and I. Tomaselli</i>	35
Moisture Dynamics of Plywood in Exterior Applications as a Basis for Service Life Prediction <i>J. Van Acker and J. De Smet</i>	47
Raw Material and Process Factors Influencing Bond Strength Development in Veneer-Based Products <i>A. Rohumaa, M. Hughes, M. Ohlmeyer and T. Kallio</i>	61
Performance Testing of Plywood Produced with DMDHEU-Modified Veneers of <i>Fagus</i> sp., <i>Betula</i> sp. and <i>Picea</i> sp. <i>A. Dieste, A. Krause, S. Bollmus and H. Militz</i>	71
Effect of Pressing Time on the Bonding Properties and Dimensional Stability of Phenolic-Treated Plybamboo <i>U. M. K. Anwar, M. S. Sapuan, M. T. Paridah, H. Hamdan, E. S. Bakar and M. Y. Nor Yusiah</i>	81
Comparison of Simulated and Real Surface Topography Measurements in Wood Case Study: Birch Veneer <i>J. Honkanen and M. Hughes</i>	87

Session 3: Agricultural Panels and Emerging Technologies

The Compak Experience – Issues and Challenges in the Development of the Market for the Compak System Agri-board Technology <i>Graham Heslop</i>	103
The Manufacture of Solid Wood Composites From Microwave Modified Wood <i>P. Vinden, G. Torgovnikov, S. Przewloka, J. Hann and A. Shaginov</i>	111
Lightweight Particleboards Made From Annual and Perennial Plants <i>B. Dix, P. Meinlschmidt and V. Thole</i>	121

Session 4: Technology and Process Control

Status Quo of Board Manufacturing Process Equipment – Where Do We Go From Here? <i>John G Sharp</i>	137
Production Safety During Wood-Based Panels Production <i>Ralf Schäckel</i>	145
New Plant Concepts for the Industrial Production of Natural Wood Panels <i>A. Kandelbauer, A. Penker, V. Mandl and T. Greigeritsch</i>	149
Optimization of Pressing Process Through Statistical Tools <i>T. Sandweg and G. Bernardy</i>	159

Session 5: Resins

Study of the Morphology of Urea-Formaldehyde Resins <i>J. Ferra, A.M. Mendes, M.R. Costa, L.H. Carvalho and F.D. Magalhães</i>	171
Study Concerning The Gluing Shearing Strength of Some Adhesive Compounds Based on the Mixed Furan Resin with Furfural Alcohol FC-2 URELIT type, Ureic Resin URELIT R Type and Lignin <i>V. Petrovici, A.M. Varodi and E.A. Salca</i>	185
Volatile Organic Compounds (VOC) from Thermomechanical (TMP) and Chemo-Thermomechanical Pulps (CTMP) and Fibreboards Made Therefrom <i>E. Roffael, B. Dix and T. Schneider</i>	197
Use of Natural Phenolic Compounds as a Binder in Particleboard <i>Javad Torkaman</i>	209

Session 6: Raw Materials

Composites Based on Recycled Paper <i>M. Irle</i>	219
------------------------------------------------------------	-----

Laboratory Production of Decay Resistant and Dimensionally Stable One Layer Particleboard by Chemical Modification with Propionic Anhydride <i>A. Papadopoulos</i>	225
Wood Species Impact on Mechanical and Hydrophobic Properties of Heat Treated Wood <i>I. Akerfelds, J. Kazocins and A. Morozovs</i>	231
'Bio Resin' from CNSL for Panel Products <i>M. Das and H. Panchal</i>	245
Influence of Beech Particle Size Used in Surface Layer on Surface Soundness of Three-Layer Particleboard <i>S. Medved and J Resnik</i>	253

Keynote Address:

Panel Market Developments – A Personal View <i>John Wadsworth</i>	263
----------------------------------------------------------------------------	-----

Poster Session

Comparative Study Upon the Distribution of the Formaldehyde Emission Determined Through the Flask Method in Relation to the Plywood Formaldehyde Content <i>V. Petrovici, S.N. Urdea and O. Zelenuic</i>	272
Improvement of Bondability in the Manufacture of Rice Husk Particleboard <i>J. Torkaman and S.M. Fatehmy</i>	281
Supply Chain as an Environmental Solution Through Rural Network for Biocomposite Panel Project in India <i>M. Das and H. Panchal</i>	287
Improvement of Bonding Mechanism in Rice Husk Particleboard Was Made With Sodium Silicate by Isocyanate Resin <i>J. Torkaman</i>	291
Impregnation of Bamboo (<i>Gigantochloa scortechinii</i>) Strips with Low-Molecular-Weight Phenol Formaldehyde Resin <i>U.M.K. Anwar, M.T. Paridah, H. Hamdan, E.S. Bakar and M.S. Sapuan</i> ...	297
The Performance of Sisal Fibres Reinforced CNSL-Based Composite Panels <i>P.B. Msemwa, J.V. Tesha, C.W. Nyahumwa and L.Y. Mwaikambo</i>	303
Degradation Behaviour and Thermal Stability of WT, UF and PF Bonded Bamboo Boards in Soil and Open Air <i>M.N. Lugoye, J.V. Tesha, C. Nyahumwa and S. Karlsson</i>	311

Potential of Bamboo as an Alternative Raw Material Through Production of Bio-Composite Panel Board For Lightweight Interior Construction Uses <i>S.A. Bahari, M. Ahmad, M.A. Jamaludin, K. Nordin M.I. Ariffin</i>	319
Laminated Bamboo Strips Lumber (LBSL) <i>S.A. Bahari, M.A. Jamaludin, M. Ahmad, K. Nordin and H. Samsudin</i>	327
Utilization of Fast Growing Species for Manufacturing Medium Density Particleboard in Bangladesh <i>M. Ashaduzzaman and A. Sharmin</i>	333
Physical and Mechanical Properties of Hydrothermally Modified Medium Density Fibreboard (MDF) <i>B. Mohebby and F. Ilbeighi</i>	341
